

Houghton Primary School
Working hard to achieve our best

E-Safety Policy

Date reviewed and adopted:	12.11.2019
Reviewed and adopted by:	Governors: Teaching, Achievement and Standards Committee
Signed: Chair of governors	
Signed: Headteacher	
Date of next review:	Autumn 2021

Contents

- The background to this policy
- Rationale
- The e-safety curriculum
- Continued Professional Development
- Monitoring, and preventing e-safety incidents
- Responding to e-safety incidents
- Appendices (including AUPs)

Background to this policy:

The purpose of this policy is to describe the safeguarding measures in place for adults and children in school in relation to e-safety, including:

- The policies and practice embedded in our school and followed by the who school community
- The infrastructure and how it is set up to keep pupils safe online, including monitoring, and preventing and responding to e-safety incidents
- A progressive, age appropriate e-safety curriculum for all pupils

E-safety in schools is primarily a safeguarding and not a computing / technology one. Therefore this policy should be viewed alongside other Safeguarding policies and approaches including, but not limited to:

- Professional boundaries in relation to your personal internet use and social networking online – advice to staff (LSCB)
- Safeguarding and Child Protection
- Personal Social and Health Education (PSHE)
- Safer Working Practices
- Data Protection Policy
- Anti-Bullying Policy
- School Complaints Procedure
- Cambridgeshire Progression in Computing Capability Materials
- Whistle Blowing Policy

This policy must be read alongside the staff and pupil Acceptable Use Policies attached as appendices. These AUPs outline the expectations and sanctions which apply to staff and pupil use of technology.

The development of our safety policy involved:

- The Headteacher

- The Designated Person for Child Protection
- The Computing Subject Leader
- The governor responsible for Safeguarding

All staff must be familiar with this policy and all staff and pupils must sign the relevant Acceptable Use Policy before being allowed to access school's systems (see appendices). As E-safety is an important part of strategic leadership within the school, all staff have a shared responsibility to ensure that the policy and practices are embedded. This will be monitored by the Headteacher, the Designated Person for Child Protection and governors.

Rationale:

At Houghton Primary School we believe that the use of technology in schools brings great benefits. To live, learn and work successfully in an increasingly complex and information-rich society, our children must be able to use technology effectively.

The use of these exciting and innovative technology tools in school and at home has been shown to support learning and promote pupil achievement. Yet at the same time, we recognise that the use of these new technologies can put young people at risk within and outside the school.

The risks they may face can broadly be categorised into the '3 C's' **Contact**, **Content** and **Conduct** (Livingston and Haddon) and may include;

- Access to harmful, illegal or otherwise unsuitable content including gaming, gambling sites, sexually explicit material and websites with extremist ideologies and images
- Unauthorised access to / loss of / sharing of personal information
- The risk of being subject to grooming by those with whom they make contact on the internet including the sharing of self-generated indecent images.
- Inappropriate communication / contact with others including adults posing as children or young adults
- The sharing / distribution of personal images without an individual's consent or knowledge
- Cyber-bullying
- An inability to evaluate the quality, accuracy and relevance of information on the internet (fake news)
- Being subject to commercial advertising
- Plagiarism and copyright infringement

Houghton Primary School

- Illegal downloading or streaming of music or video files
- The potential for excessive use which may impact on the social and emotional development and learning of the young person.

While children and young people need support to keep them safe online, the risks associated with the use of technology are not restricted to just them. E-Safety issues can also affect adults who work or are associated with the school and this will be referenced in more detail later in this policy.

Technologies regularly used by pupils and staff include:

Staff:

- Staff laptops and also desktops in the office including staff level internet access, server access and access to MIS systems.
- Some staff have access to MIS systems from home via a secure logon and keyfob. Staff laptops can also be used at home in accordance with the staff AUP.
- Curriculum iPads for preparing and delivering pupil activities
- Class cameras and other peripherals such as visualisers and Interactive Whiteboards

Pupils:

- Curriculum laptops, netbooks and iPads including filtered access to the Internet and pupil level access to areas of the school network
- Cameras and peripherals including programming resources (Beebots, control equipment, class cameras etc.)

Where the school changes the use of existing technology or introduces new technologies which may pose risks to pupils' safety, a risk assessment will be completed to show how the risk is being mitigated and reduced to an acceptable level.

The e-safety curriculum:

When using online technologies, it is essential that children understand how to behave in a safe and responsible manner and also how to react when faced with inappropriate content or situations which make them feel uncomfortable. The need for a progressive, age appropriate e-safety curriculum is clearly documented in the National Curriculum for Computing which states that:

- **At KS1:** use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they

E Safety Policy

have concerns about content or contact on the internet or other online technologies.

- **At KS2:** use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.

At Houghton Primary School we believe that a comprehensive programme of online safety education is vital for developing our pupils' ability to use technologies safely. We believe that just as children learn how to swim by going to a swimming pool so they will learn safe life-long online behaviours by accessing and using a range of online services including the World Wide Web. This is achieved using a combination of:

- Discrete and embedded activities drawn from a selection of appropriate materials including those produced by CEOP and linked to demonstrating safe practice in our online learning platform Purple Mash.
- Our programme for e-safety education is evidenced in teachers' planning either as discrete or embedded activities.
- Key e-safety messages are delivered and reinforced through cross curricular opportunities such as emailing, researching, blogging and communicating in appropriate online environments such as Purple Mash.

Continued Professional Development:

- Staff at Houghton Primary School receive up-to-date information and training on e-Safety issues in the form of staff meetings and updates from Computing Subject Leader, as well as training from external providers where appropriate.
- New staff receive information on the school's acceptable use policy as part of their induction, including advice on Protecting their Professional Reputation Online.
- All staff have been made aware of individual responsibilities relating to the safeguarding of children within the context of online Safety and know what to do in the event of misuse of technology by any member of the school community.

School website:

Schools are required to publish certain information online. At Houghton Primary School we provide this information on our school website www.houghton.cambs.sch.uk

The main purpose of our school website is to provide information. Our school website will not only tell the world that our school exists, but it will provide

information our pupils and parents, promote the school to prospective ones and publish the statutory information required by the Department for Education. In conjunction with a range of online services, our school website can be used to showcase examples of pupils' work - in words, pictures, sound or movie clips - and can share resources for teaching and learning both within the school and with colleagues elsewhere.

Under safeguarding responsibilities, it is the duty of a school to ensure that every child in their care is safe, and the same principles should apply to the virtual presence of a school as it would apply to its physical surroundings. The head teachers and the Governing Body therefore take on the responsibility to ensure that no individual child can be identified or contacted either via, or as a result of information displayed on the school website.

The school has established clear policies to ensure that its website is maintained, is effective, and does not compromise the safety of the pupils or staff.

Monitoring, and averting e-safety incidents:

The school keeps children safe when using online technologies through a combination of online safety education, filtering and monitoring children's online activity and reporting incidents, including following Child protection procedures where appropriate.

The school's technology infrastructure is designed to minimise the risks associated with adult and pupil use of technology. This is provided and maintained by both the East of England Broadband Network (E2BN) and the Local Authority's Education ICT Service. Safeguards built into the school's infrastructure include:

- Secure, private CPSN provided internet connection to each school with a direct link to the National Education Network.
- Managed firewalling.
- Base line and enhanced filtering provided by the LA provided approved filtering system.
- CPSN provided Sophos antivirus package.
- Council funded email system for all school staff with direct internal routes to the council for trusted email communications.
- Restrictions on download of software, apps and file types from known compromised sites

- Wireless networks installed by the ICT Service are encrypted to industry best practice standards and the wireless key should be kept securely in the school office.

Staff also monitor pupils' use of technology and, specifically, their activity online.

- Pupils' use of online services (including the World Wide Web) are supervised in school at all times.
- Staff respond to reports of any concerns relating to e-safety from pupils or parents.
- Staff are also able to monitor pupil's activity in the Purple Mash online environment, allowing them to identify inappropriate or concerning online behaviour, as well as respond to reports of any such behaviour from pupils or parents.

A system of staff and pupil passwords is in place to enable appropriate access to the school network.

- All members of staff have individual, password protected logins to the school network and SIMS.
- Visitors to the school can access part of the network using a generic visitor login and password.
- The school's network can either be accessed using a wired or wireless connection. However, the wireless network is encrypted to the standards advised by the Local Authority and the wireless key is kept securely by the school office.
- School staff and pupils are not permitted to connect personal devices to the school's wireless network and a guest wireless key is issued to visitors on a case by case basis.

Whilst we recognise that it is impossible to totally eliminate the risks associated with the use of technology, these safeguards are in place to help minimise these risks as much as possible.

Responding to e-safety incidents:

It is important that all members of staff – teaching and non-teaching – are aware of how to respond if an online safety incident occurs or they suspect a child is at risk through their use of technology.

- Staff responses to online safety incidents must be consistent with responses to other incidents in school. This may mean that serious actions have to be taken in some circumstances.

Houghton Primary School

- If an online safety incident occurs, Houghton Primary School will follow its agreed procedures for responding including internal sanctions and involvement of parents (this may include the deactivation of accounts or restricted access to systems as per the school's AUPs – see appendix).

In addition, the Education and Inspections Act 2006 empowers headteachers to such extent as is reasonable, to regulate the behaviour of pupils when they are off the school site and empowers members of staff to impose disciplinary penalties for inappropriate behaviour. This is pertinent to incidents of cyber-bullying, or other e-safety incidents which may take place outside of the school but has an impact within the school community.

With this in mind, the headteacher may decide to apply the sanctions and / or procedures in the relevant AUP to incidents which occur outside of schools if s/he deems it appropriate.

The Education Act 2011 gives school staff the powers, in some circumstances to search personal digital devices and decide whether or not to delete data or files if the person thinks there is good reason to do so.

However, there is a risk that this could conflict with guidance about dealing with incidents where a child may be at risk where it may be inadvisable to delete, save or share content. The school will always seek to resolve areas of concern with parents (where appropriate) before taking any further action.

In our school, the likelihood of these types of instances occurring are already reduced as we don't allow pupils to use personal devices in school.

Where the school suspects that an incident may constitute a Child Protection issue, the usual Child Protection procedures will be followed. This process is illustrated in the diagram to the right.

Policy review

This policy was presented to the Teaching, Achievement, Behaviour and Safety Committee of the governing body on and ratified 12th November 2019 and will be formally reviewed in Autumn 2021.

This policy may also be partly reviewed and / or adapted in response to specific e-safety incidents or developments in the school's use of technology. It has

E Safety Policy

been shared with all staff via email and a staff meeting and is readily available on the school network and website.

You come across a child protection concern involving technology ...
